WHAT I DO

Product Strategy
Interaction Design
Wireframing
Digital Prototyping
Physical Prototyping
User Research
Storyboarding
A/B Usability Testing
Product Management
Animation
Visual Design
Competitive Analysis
Design Systems
Design Ops

WHAT I USE

Adobe Illustrator
Adobe InDesign
Adobe Photoshop
Figma
HTML/CSS
React
Framer
Claude AI
Codex

CARNEGIE MELLON UNIVERSITY

MASTER OF HUMAN COMPUTER INTERACTION

UNIVERSITY OF PITTSBURGH

BACHELOR OF ARTS IN CHINESE
BACHELOR OF ARTS IN ECONOMICS

DESIGN LEAD

2023-PRESENT, SYSGIT

Built 0→1 product for an AI-driven systems engineering platform, shipping dozens of end-to-end workflows across complex engineering models, Git-based versioning, and AI automation—helping secure \$4.1M in funding.

Owned UX metrics, research, and design culture: synthesized 40+ hours of user research, set quality bars, and aligned product direction with engineering and product leadership.

Initiated a Design/Rev Ops partnership by creating an agentic product feedback and competitive analysis pipeline linked to sales and existing customer outcomes.

Created and scaled a component-based design system, facilitated by self-written agentic workflows, enabling engineering to self-serve and accelerating shipping velocity.

SENIOR PRODUCT DESIGNER

2022-2023, SLINGSHOT AEROSPACE

Led end-to-end design for mission-critical B2B software used by 60% of active satellites—high-stakes, data-dense workflows where trust, accuracy, and speed are non-negotiable

Translated deep domain complexity into intuitive decision flows, partnering with astrophysicists and subject matter experts through rapid research cycles.

Co-created branding and design system across 5 product lines, scaling cohesive patterns across a fast-growing product surface

SENIOR UX DESIGNER

2018-2022, TURNITIN

Owned 0→1 design for Turnitin's first ML platform, making complex algorithmic outputs trustworthy and actionable—experience with AI-powered detection workflows directly relevant to vulnerability detection and triage

Designed and shipped Gradescope's first mobile app (10K+ institutions), rethinking structure to match user mental models as product surface grew. Ran dozens of hours of usability studies and user feedback sessions.

Built visual, animation, and component standards for a design system used by 25 designers, accelerating craft consistency and design-to-engineering handoff
